Digital Transformation and SME Performance in India

Abstract

This study examines how digital transformation affects small and medium-sized enterprises (SMEs) performance in India. It uses survey and interview evidence from manufacturing and service firms.

Introduction

Digital transformation has become central to SME competitiveness, but smaller firms face financial, skill, and infrastructure constraints. The literature has emphasized large enterprises more than emerging-economy SMEs, creating a gap in contextual evidence.

Literature Review

Vial (2019) defines digital transformation as a process where digital technologies trigger strategic organizational responses. Resource-based theory suggests that firms gain advantage when digital capabilities are valuable, rare, and difficult to imitate.

Methodology

The study uses a mixed-methods design. A survey was administered to SME owners and managers across Maharashtra, Tamil Nadu, and Gujarat. Semi-structured interviews were used to explore adoption barriers.

Results

The survey indicated that firms with higher digital maturity reported stronger revenue growth and operational efficiency. Many respondents identified digital skill shortages as a barrier.

Discussion

The findings support the role of digital capability as a performance resource, while showing that local infrastructure and skills shape the actual gains.

Conclusion

Digital transformation can improve SME performance in India, but outcomes depend on skill development and implementation capability.

Approved Improvement Plan

Strengthen originality and contribution

Convert descriptive material into synthesis: what is combined, what gap remains, and what the researcher contributes without overclaiming.

Strengthen citation signal

Add real citations to unsupported factual claims. Use the suggested citations below or find verified sources for each claim. Normalize citation style to APA 7 format without inventing sources. Real citation suggestions from open research sources: • A Novel Approach to Analyze Fashion Digital Archive from Humanities (2021) — via arXiv • Building and development of an organizational competence for digital transformation in SMEs (2024) — via arXiv • Digital Democracy: Episode IV -- A New Hope, How a Corporation for Public Software Could Transform Digital Engagement for Government and Civil Society (2019) — via arXiv • Digital transformation (2025) — via Crossref Use these or similar verified citations. Only add citations for claims that genuinely reference these works.

Improve Whole Document (Pages 1–13)

Revise pages 1–13 for citation support, original contribution while preserving claims, TOC headings, and citations.

OTIF Final Integrity Certificate

This package was generated from user-reviewed chapter edits and an approved OTIF improvement plan. Citations and source claims remain the author's responsibility.
