Digital Transformation and SME Performance

Abstract

This draft examines digital transformation in small firms using a research-backed framing (Vial, 2019).

Introduction

Digital transformation is treated as a strategic organizational change process rather than a narrow technology upgrade (Vial, 2019).

Methods

The proposed study uses a mixed-methods design to connect adoption barriers with performance outcomes.

Results

The expected results section should report evidence without inventing unsupported statistics.

Discussion

The discussion links digital capability, organizational learning, and contextual constraints.
